

VM FLYTRAP PLATFORM

September 5, 2021 Copyright 2021

Description: The beauty of nature is concise perfection and fluidity of movement, and VM FlyTrap Custom Algorithmic designed products are the mathematical model of this motion in action. The acute trigonometric precision of VM non-linear, rational, ratio-balanced mechanics unlocks the secrets of nature by eliminating age old mathematical processes based on non-precise irrational concepts. VM constants are rational and challenge constants like pi, the Golden Ratio, and the embedded square root systems, to unleash humanities fullest scientific potential in algorithmic DNA double helix designed blockchain. VM is: Very fast, performance based, zero point energy, zero computational effort, zero point dimension, zero heat generation, infinitely scalable, load bearing, self-generating, superconducting, interactive blockchain and hashing tables. VM: Bringing quantum level computing to REGULAR computational systems. VM: Maximizing nature's potential, moving like water WITH the fluidity of the world around us, bringing a more sustainable future for a global humanity.

Implementation:

VM Mathematics Rational, Ratio-Based Trigonometry: Semiconducting Toroidal Field Blockchain vCPU Application, Geometrically Secure Cryptographic Design, Cool Operations, Self-Sustaining Geometric Blockchain, Unprecedented speeds <32 Million TPS, (Algorithmic design: a nine step mathematical equation: Test venue; **laptop**).

Infallible Blockchain ID interface: Upload-(ANY) population and data, through VM algorithmic placement of data on VM infinitely expansive, self sustaining, system. Featuring VM unique 360 day POS/POH system for verification of data. VM features very simple clean code designed blockchain systems.
